

**China-CEEC**  
Blockchain Centre of Excellence

*China-CEEC Blockchain Center of Excellence*  
*Introduction*

## Vision

The vision of the centre is to become the leading global Centre of Excellence focused on boosting the applied and fundamental research on blockchain and DLT technologies.

## Mission

The China-CEEC Blockchain Centre of Excellence will be focused on research effort on blockchain and DLT technologies. The centre's primary mission is to support the thriving ecosystem by developing new technologies needed to advance the field as well as to support the implementation of the Belt and Road Initiative.

Beyond its research mission, the centre wants to run an extensive education and outreach program, as well as to support prospective innovative startups, talented teams and individuals by offering them the equity investment and scholarship to onboard them to the platform.

## R&D Tracks

The major part of the activities of the China-CEEC Blockchain Centre of Excellence will focus on fundamental and applied research in 5 proposed R&D tracks or thematic areas:

**Track 1**  
Technology,  
Cryptography &  
Cybersecurity

**Track 2**  
Blockchains in  
Prospective Verticals,  
Industry 4.0 and IoT

**Track 3**  
Token Economics,  
Business Applications  
and Impact

**Track 4**  
Financial, Regulatory,  
Legal and Political  
Aspects of Blockchain

**Track 5**  
Data Science for  
Blockchain

For each R&D track we will appoint the leader who will select and manage partners and will be responsible for the deliverables of the research and innovation activities.

## Project Timeframe

08-2019

Presenting the project proposal to the partners in China, setting up the project proposals, getting support from SK and CN government.
